

# Customized Devices & Software

Are you a cosmetic company and looking for a new way to promote your products and brands? Our worldwide acknowledged skin testing instruments help you to get ahead of your competitors.

- combination of measurement methods according to your specific needs
- from adding just your logo to creating your own design, everything is possible

- choose the measurement parameters, the material, shape, colour and printing of the housing

- designs as miniature handheld devices, luxury stand alone units, or electronic built-in towers can be done

- appealing software to match your products and philosophies can be designed
- even for small quantities of devices there is no limit...

The designs of shown devices and software are property of the respective companies (Juvena, KBL, Lancôme, Pierre Fabre, Pond's Institute, Vichy).
